

## Returning to an earlier version

There are times when this is desirable or necessary.

1. Save the patients database using Tools within Clasp and/or the Windows Explorer Route.
2. Delete the Clasp program
  - START> Settings>Control Panel>Double Click Add/Remove Programs>
  - a. Select by clicking Clasp database Engine Install>Remove Program
  - b. Select by clicking Clasp >Remove Program
  - c. Open Windows Explorer or My Computer> Access “C” drive, Select Clasp Folder (the yellow file symbol) and select delete from the top toolbar OR File>Delete
3. Reinstall completely as for first installation
4. Restore the patient database.
