Oxidation					
Vit Defic/Excess					
Water Acid/Alk					
pH					

Notes

1. Annotate high, medium, low
2. Colour code buttons: if any area is (actively) significant there will be a significant number of reds and purples compared to the number in the main matrix.
3. Risk profile: Test>Programs>Risk profile>Load Current patient
4. Nelson report: Test>More Research and reports >Nelson report>make a Nelson Medicine Report
5. Group Search: use the form below

Group Search System

Top 3 Complaints(from client)			
From Test Screen			
Reg. Dysfunction's & Explore Risk			
Top 3 Narayani Rx			
Top 3 Combo Rx DR			
Top 3 Combo Rx NV			
Top 3 Guna Rx			
Top 3 Diseases			
Top 3 Ayuvedics			
Top 3 Oriental Herbs			
Below 30 scores			
From Risk profile Screen			
Top 3 Oriental Combos

Bottom 3 Risk category			
Spinal&Sarcode			
Top 3 Organ sarcode			
Bottom Organ sarcode			
<i>Emotions (if relevant)</i>			
Bach Flower			
Emotions			
Flower essences			

Chronic Issues

These may not have a high activity: thus they may not show in the top scores.

ALSO

If there appear to be no active issues that make sense or correlate with why the client has come then:

Look for

1. Leaks showing as active in the top scores
2. The issues hiding at the bottom of the test matrix
3. Search using the client complaint: do an individual reaction
4. Consider from your knowledge the possible causal chains that may manifest in the client symptoms/"diagnosis": use the hold trays below.

Leak throughs

Chronic Issues	Leak sign?

Low scores hidere

Highest red		Lowest score	
Lowest red		Band reds	
Band difference		Top of bottom "red" band 1	
No. reds		Top of bottom "red" band 2	
Highest purple		Top of bottom "red" band 1= bottom of bottom purple band	
Lowest purple		Band difference	
		Top of bottom "purple" band 2	
		Top of bottom "purple" band 2	
No. purples		No. purples	

Chronic Issues	In low band??
